CENTERVISION SERIES

Next-Generation Measurement Devices Powered by Cutting-Edge Technology

Elegant and Modern Design Aesthetics

Immersive 3D Animations and Interactive User Interface

Innovative Solutions That Elevate the Value and Profitability of Your Business

Proudly presented by CenterVision®

PRECISION MEASUREMENT TECHNOLOGY

The stereo camera system delivers high-resolution imaging for precision measurements.

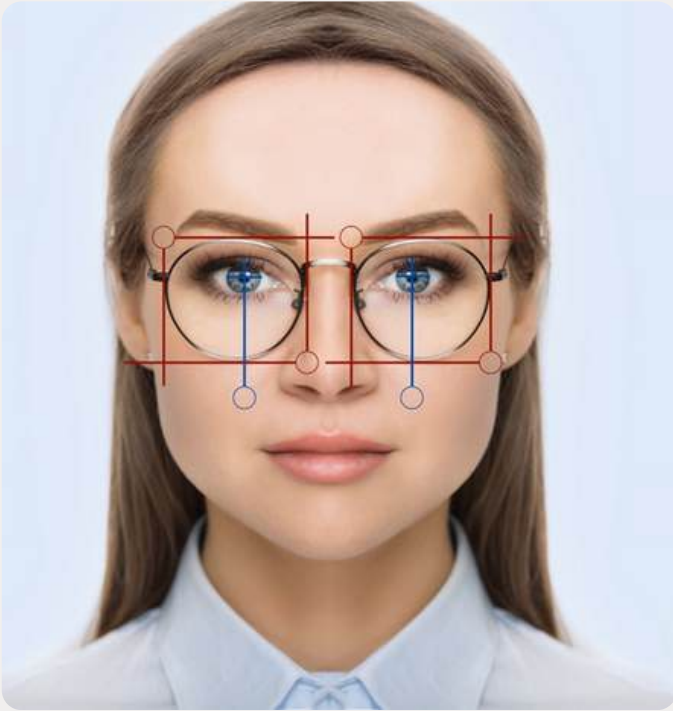

Its redesigned lens and fast autofocus ensure superior accuracy and image clarity.

No additional tools required - our latest software enables seamless, contact-free measurement.

It eliminates the risks commonly associated with manual pupillary distance assessment.

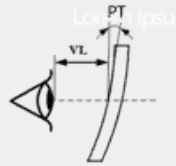

SUPPORTED MEASUREMENTS & PRECISION LENS CUTTING

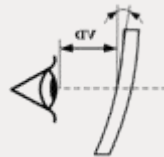

Pupillary Distance

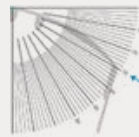

Frame Dimensions

Pantoscopic Angle

Vertex Distance

Frame Angle

Progressive lenses are laser-cut to perfection based on client-specific measurements collected through the CenterVision system.

SMART DATA MANAGEMENT

Securely record and manage client data in the built-in database system.

Expand your storage capacity with high-performance memory options.

Always keep your data safe. Print it out or mail it to your customers who request it.

Customer Information, Prescription Information, Lens Information, Frame Information and more

The screenshot displays the SMART DATA MANAGEMENT software interface, which is organized into several sections for data entry and visualization:

- CUSTOMER INFORMATION:** Includes fields for Order No., Customer No. (1), Date (10.04.2025), Name, Surname, E-Mail, Date Of Birth (10.04.2025), Photo, and ID No.
- PRESCRIPTION INFORMATION:** A table for recording vision data for Right (R) and Left (L) eyes, with columns for SPH, CYL, AXI, ADD, and LENS.
- INFORMATION LENS:** Fields for Type Lens, Brand, and Model, along with a NOTE section.
- FRAME INFORMATION:** Fields for Brand, Model, Color, and Price (0).
- FRAME TYPE:** Radio button options for FULL (selected), NYLOR, and RIMLESS.
- MEASUREMENT INFORMATIONS:** A diagram of a pair of glasses with various measurements labeled: Frame H. (46.5), Frame W. (47.9), PD (60.3), R PD (31), L PD (29), DBL (20.6), Optic Y (29.4), and Optic Y (22.8).
- Navigation and Action:** Includes a search icon, a list of items (ID 1), navigation arrows (< >), a user icon, and a row of action buttons (FAn, VCD, PT, 0, 0, 0) and a set of icons for mail, print, keyboard, download, and refresh.

MOVING SCREEN AND CAMERA

The high-resolution stereo camera captures crisp, detailed images with enhanced sensitivity, enabling highly accurate measurements.

Its vertical movement system allows for comfortable and adjustable positioning during the process.

Easily engage with your client while taking measurements in a smooth and professional setting.

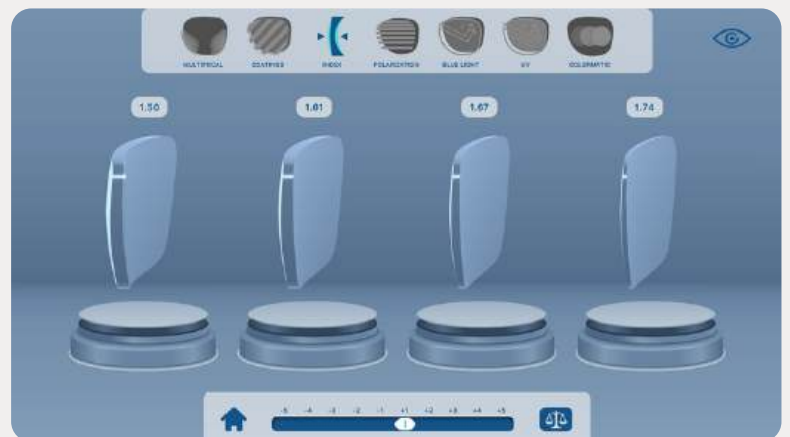

3D ANIMATIONS

Enhance your lens and frame sales presentations with a redesigned interface and dynamic animations.

This application simplifies the communication of cutting-edge optical lens technologies, helping clients better understand their options and supporting a smoother sales process.

You can also integrate your own brand visuals to boost engagement and maximize sales potential.

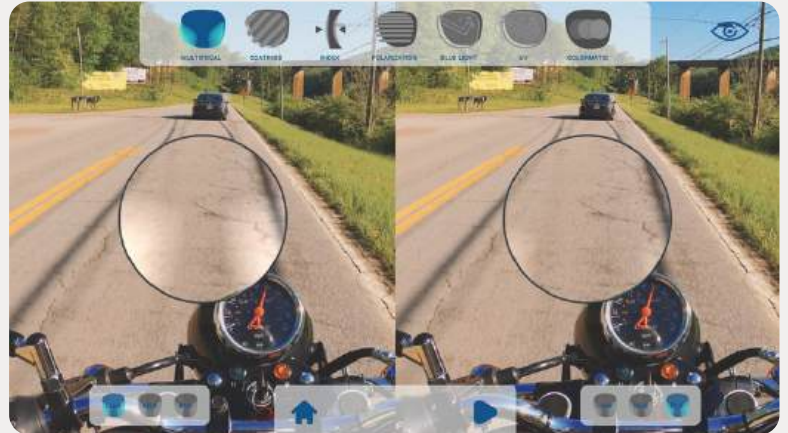

3D ANIMATIONS

Compare Standard and Freeform Progressive Lenses side by side.

Empower your customers to make faster, smarter, and more informed purchasing decisions.

The application provides a clear visual comparison between lens types using compelling, high-impact visuals.

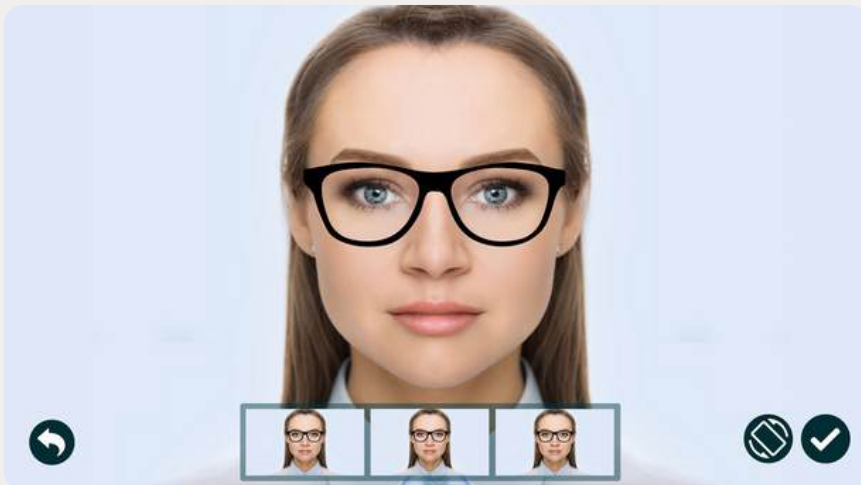

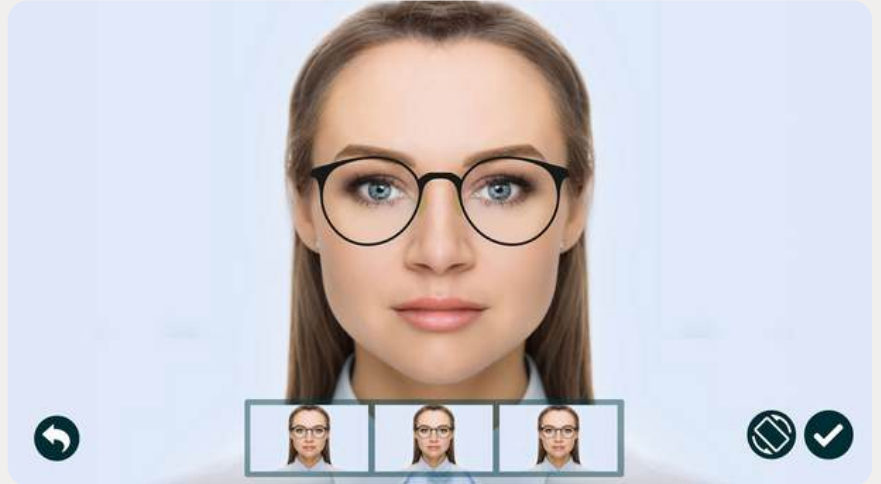

Eyeglass sales have increased by up to 30% thanks to this engaging presentation tool.

FRAME SELECTION ASSISTANCE

Choosing the right frame with CenterVision is both simple and enjoyable.

The enhanced stereo camera captures high-quality images, helping customers make confident decisions more quickly.

High-quality images create a premium experience for your customers-ultimately increasing your sales efficiency.

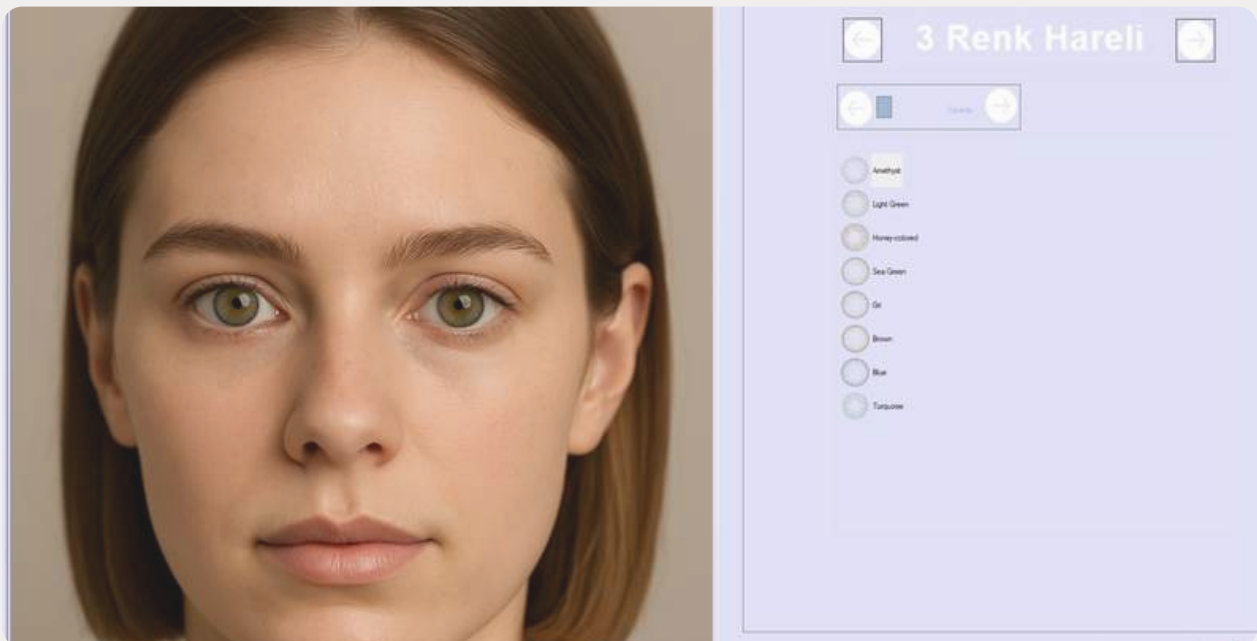

CONTACT LENS SELECTION ASSISTANCE

Now your clients can try colored contact lenses virtually-without any physical contact, offering a hygienic and safe experience.

Showcase and compare vibrant lens colors through high-quality visuals.

Let customers see exactly how the lenses will look on their eyes-no need to physically try them on.

Visual tools that turn interest into sales

CENTERVISION OFFICE 360

Your entire workshop-now seamlessly integrated into a compact desk.

The CenterVision Desk enhances your store's visual identity with customizable color and size options.

Its foldable design easily transforms into a sleek, modern workstation.

The CenterVision Office 360 model features a 360-degree rotatable display for maximum flexibility and usability.

CenterVision Kiosk makes innovation fit anywhere.

CENTERVISION TABLEAU

- Apparatus-free measurement technology
- User-friendly on-screen interface
- Progressive lens comparison module
- Overlay animations for visual clarity
- Lens index comparison tool
- Intelligent frame selection assistant
- Virtual contact lens selection assistant
- Integrated client data recording system
- Powered by Windows 11 operating system
- High-resolution 32" display
- Capacitive touch panel for responsive interaction
- Built-in Wi-Fi connectivity
- Sleek, slimmed-down design
- Compact case with 75mm thickness

Kiosk and Tableau models have identical features.

Kiosk is freestanding, Tableau is wall-mounted.

CENTERVISION ALLINONE

It's both a computer and a precision measuring device — all in one.

Includes the full range of CenterVision features in a compact, integrated unit.

Equipped with a high-resolution display that rotates 360 degrees.

Its minimalist, aesthetically refined design fits seamlessly on your desk and complements any modern office environment.

**Less space. More capability.
CenterVision All-in-One — your
optical powerhouse.**

CENTERVISION ALLINONE

- 24" high-resolution touchscreen display
- Motorized camera movement for precision control
- Stylish design with mirror-like surface functionality
- 360° rotating screen for flexible use
- Fully integrated desktop computer system
- Built-in Wi-Fi connectivity
- Adjustable screen tilt and height
- Advanced measurement capabilities
- Intuitive, interactive user interface
- Tools for lens comparison and selection
- Integrated client database management system

CENTER VISION®

For more than 28 years, we are very happy to meet our customers with our CenterVision brand.

Centervision, which we have been working on for many years as a result of our R&D projects, has become one of the most sensitive measuring devices in the world by adding a first to the optical sector in Turkey and in the world today.

We continue to lead the industry with our vision, reliability, equipment and measurement technology.

We export Centervision models all over the world with our proven commercial partnerships in the global optical industry.

We aim to keep our products constantly updated and dynamic with our staff and technical competence, which renews itself day by day and can integrate into changing technology, and we realize this goal as a team.

Become a CenterVision partner today.
